### A little about me

After leaving university early, studying Marketing, I sought to find a more fulfilling career in which I can make really cool stuff. From dabbling in a little blogging I found myself taking a lot of interest in web development and since mid 2018 I have spent a considerable amount of my free time studying and playing around with full-stack web development. A lot of what I have learnt has been self-taught through various online resources as well as enrolling in Founders & Coders full-stack programming course.

Founders and Coders is a peer-led coding course which has been invaluable towards my progression as a developer, it has taught me not only the technical skills but also the soft skills when working in teams and adopting an agile workflow. For some projects I was able to take on a scrum master role which taught me how to oversee and organise the project as well as being in charge of communications with the client. Other projects I was able to take on a UX Lead role in which I was able to show my creative flair and design a wireframe in Figma.

### Skills

Tech-Stack: JavaScript/ ES6, React.js, Node.js. Express, Tape, Handlebars, PostgreSQL, HTML5, CSS

Other: Figma, Adobe Suite(Photoshop, Illustrator, After Effects), Final Cut Pro, Motion

### Work history

Axel Arigato – Sales Associate (2017-2018)

Duties included but not limited to: serving clients, forming brand to client relationships, CRM, tracking weekly deliveries, replying to store emails from clients, handling store invoices.

### Education

- Founders and Coders C.I.C (March-June 2019)
- University of Essex (2015-2017) - Marketing (2:1)
- A-Levels at Addey and Stanhope Sixth Form (2013-2015) - Mathematics (A), Economics (B), Psychology (B), Business Studies (Distinction)

### Hobbies

In my spare time I like to go to coding meetups and talks as well as coach at Codebar workshops. I also like going to hackathons, I've been to two so far, one was to create a game to get more girls into STEM and the other was to create a app that helps with personal finance. Outside the coding world I like to travel every chance I get and from them I like to edit the photos and videos on Photoshop and After Effects. I'm also really interested in graphic design and motion graphics so I spend a lot of time on Behance.net and Dribbble.com just appreciating the work. *I also like making fonts: this one was made in my own handwriting.*
